

# Bible Translation

*Here's How It Works*

Children like these in many remote areas around the world can't hear God's word because it doesn't exist in their own heart language. . .

**SO** Translators like this. . .

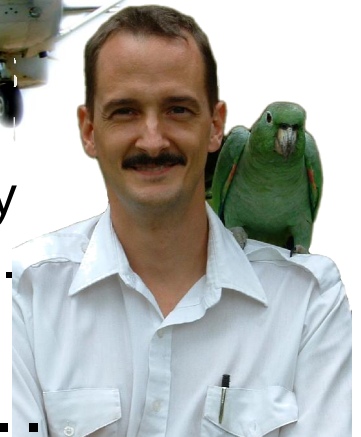

Get on airplanes like this. . .

Flown by pilots like this. . .

Trained by people like me. . .

Supported by people like YOU. . .

**SO** God's living word can change more lives around the world

My work at JAARS will not only benefit Bible Translation, but also help South America Mission who depends on JAARS for necessary support in mission aviation. I will be directly involved in the evaluation and advanced training for perspective pilots wishing to serve with South America Mission, as well as Wycliffe Bible Translators and others. This is a great way for missions to partner together and share resources in order to get the work done.

Thank you for being part of this chain. Without your support we would be missing a critical link in this incredible work.
